WHERE IT GOES
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

A half cone 174 mm long, 2 mm wall, inside radius 41 mm at the elbow end and 35 mm at the wrist end (forearm plus the 4 mm liner); its edges stop 8 mm below the forearm's centre line.

Print on its back on tree supports; 12 mm holes on a grid every 17 mm along and 25 degrees round (70 holes).

Six 3.4 mm holes for the pack screws, 9 mm each side of the top line, at 18.5, 86.5 and 154.5 mm from the elbow end, on the solid strips between hole columns.

Fits: pack ribs sit on its top; M3 button-head screws go up from inside into the ribs' inserts; liner glued inside; straps go round outside.

Check: sits on the forearm without rocking; the six screw holes line up with the pack's rib bosses.
