WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Make four. A block 5 long x 14 wide x 6 tall.

Two 5.2 mm seats 3 mm deep from the front face, 8 mm apart, for the sheath ferrules; 1.6 mm tendon holes on through to the back.

Fits: sits in a pocket in the cover; its back bears on the release plate, which carries the sheaths' push. When the plate is pulled out the puck and both sheaths slide back into the channel and the two tendons go slack.

Check: the puck slides freely into a channel of the anchor block.
