WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

- A plate 7.6 x 88 x 31 mm, printed front face down.
- Four pockets 15 x 7 x 5.6 mm in the back face, one in front of each channel, for the pucks.
- Eight 4.5 mm holes through the 2 mm front wall for the sheaths, 4 mm either side of each pocket's centre.
- Four 5 mm spacer bosses 3.4 mm long on the back face with 3.4 mm holes, 30 mm each side of centre, top and bottom, for M3 x 16 screws.
- Fits: spacers on the anchor block's front face; the release plate slides in the gap between them.
- Check: the release plate slides through the gap without catching.
